

Success! Demonstrating Results Through Program Performance Measures

Beginning in FY '11, the reporting of state performance measures will be required for all Empowerment funding. The Iowa Community Empowerment State Technical Assistance Team invites funded program providers and Community Empowerment Coordinators to attend this opportunity to learn about the reporting requirements and practice the completion of the annual report requirements for funded programs.

Targeted Audience:

1. Empowerment-funded Program Providers
2. Empowerment Coordinators

Intended Outcomes:

1. Participants will gain knowledge of the state required measures to be reported for all Empowerment funds beginning in FY'11.
2. Participants will become familiar with how to report the measures within the Community Empowerment annual report template.

The training will be provided five times across the state and participation at each location will be limited as space allows. Choose from one of the following opportunities.

Directions are provided on Page 2 of this flier.
